GUIDELINES TO PAPER SUBMISSION

**Rahmat Fadhil,[1]* Muhammad Sayuti,[1] Azhari Muhammad Syam,[1]
Dandi Bachtiar,[1] & Mohammad Iqbal Mochtar [2]**

[1] *Faculty of Engineering, Universiti Putra Malaysia
43400 UPM Serdang, Selangor, Malaysia*
[2] *Industrial Automation Section, Universiti Kuala Lumpur-Malaysia France Institute
43650 Bandar Baru Bangi, Selangor, Malaysia*
* E-mail: rahmatfadhil@gmail.com

Abstract

The abstract for the full paper should *not be more than 300 words*. The abstract should be typed in Arial 10pt font, full justified and indented 0.5 inch from the left and right margins. The use of definitions and equations in the abstract is discouraged unless deemed necessary. No tables, figures or footnotes should be part of the abstract.

Keywords: keyword 1; keyword 2; etc. (maximum of 5)

Introduction

Full papers should be submitted to the respective conference secretariats in camera-ready form before the dateline. When submitting electronically, we highly recommend you to use the microsoft word format (*.doc). However to ensure correct content reproduction particularly symbolic fonts, authors should also submit the pdf or postscript versions electronically. Alternatively, authors can also submit hard copies of their manuscripts in duplicate.

Margins, Blank Lines & Text

The margins of the document should be set at one inch for the top and bottom margins and 1.25 inch for the left and right margins. The title of the paper should be in bold 13-pt Arial font while the author and address should be in italic 10-pt Arial font with the authors' names additionally boldened. Both paper title and author/address are center justified. The instructions for the abstract are given the above abstract. Authors are also required to insert headers as shown above with its justification alternating between right and left for odd and even numbered pages respectively.

Leave two blank lines (single spacing) between the title and the author/address, between the address and the abstract, between the abstract and the title of the first section of the paper, and between end of each section and the title of the following section.

The main text of the paper should be typed in single spaced Arial 11 pt font with the section's title in bold. A single blank line is inserted between title of each section and the following paragraph of text and also between paragraphs of each section. The total length of contributed paper (including figures and tables) *should not exceed 10 pages*.

Figures, Equations, Symbols and Footnotes

All figures (e.g. graphs, photos, illustrations) and tables should be inserted nearby the referring text. They should be numbered according to their order of appearance (see Figs. 1, 2 and Table 1 below) and accompanying caption should be in 10pt italicized Arial font.

Fig. 1: Fisherboats in Banda Aceh

Fig. 2: Masjid Putra in Putrajaya.[1]

Dimension D	Dirac	Majorana	Weyl	Majorana-Weyl
4	Yes	Yes	Yes	No
5	Yes	No	No	No
6	Yes	No	Yes	No
7	Yes	No	No	No
8	Yes	Yes	Yes	No
9	Yes	Yes	No	No
10	Yes	Yes	Yes	Yes
11	Yes	Yes	No	No

Table 1: Existence of Types of Spinors in Dimensions $4 \leq D \leq 11$.[2]

Equations should be treated of equal status as the main text and hence should be given the appropriate punctuation marks. Equations are also numbered according to their order of appearance. Given below are the examples of Schrodinger equation (Eq. 1) and Einstein equation (Eq. 2):

$$i\hbar \, \frac{\partial \psi}{\partial t} \; = \; \hat{H} \, \psi \qquad ; \tag{1}$$

$$G_{\mu\nu} \; = \; \kappa \, T_{\mu\nu} \qquad . \tag{2}$$

Any usage of nonconventional symbols should be indicated in the author's accompanying correspondence stating its page and line number with its source of font's name as exemplified in the following sentence. The symbol ϖ is from Wingdings font of position 0x6A.

Footnotes in the text should not be used unless they are necessary to maintain the flow of the paper. Where used in the text, footnotes should be designated by Roman alphabets and the corresponding footnote should be placed at the bottom of the page where it is referenced.

Citations and References

All references will be typed in 10 pt Arial font and are numbered according to the order of its citation in the text. Citations are thus given in terms of their square-bracketed numbers either in the form of superscripts or in line with the text.[a]

Journal titles are of equal status with titles of books and they are italicized. The volume number of the journal reference is given after its title in bold, followed by its year in bracket and the article's page numbers (see e.g. [3]). Authors are very much encouraged to include the title of the journal's article in quotation marks if space permits (see e.g. [4]).

For articles from proceedings or edited volumes, the book title (in italics) should come after the article's title (in quotation marks). This is followed by the names of editors; its publisher and year of publication, and its page numbers (see e.g. [5]). References of unpublished materials e.g. theses, reports and preprints should have their titles, report numbers (if they exist), places and years of publication (see e.g. [6, 7]).

Conclusion

Paper submissions that conform to the above guidelines are very much appreciated; this will help the committee to produce the proceedings in time for distribution during the congress. The technical committee reserves the right to alter any manuscripts that do not conform to the above guidelines.

Citing and listing of web references. As a minimum, the full URL should be given. Any further information, if known (author names, dates, reference to a source publication, etc.), should also be given. Web references can be listed separately (e.g., after the reference list) under a different heading if desired, or can be included in the reference list.

(OPTION)

Brief professional biography of presenter: Arial, 10 pts, approx 35 words. With photo.

---

[a] Such citations have the advantage of being economical in occupying space of manuscripts, which is crucial in proceeding papers.
